**How can I Download this Information for my Agency's Records -**

Most of the pages that provide search results have an "Export" button at the bottom of the page that will allow you to download all or just some selected data from that search for your agency's use as either a CSV Comma Delimited (*.csv) spreadsheet, an Excel (*.xls) spreadsheet, or as an XML data page.

The Vehicle Report for the individual agency has a "Printer Friendly" button that when clicked displays a Monthly Vehicle Report in a pdf format that could be printed out and be used to assist users in the collection of the current meter readings of their vehicles.
