

How to Search for a Vehicle's Usage Details -

From the Main Menu, under the Search heading, select “Usage.” That will bring you to a Search Usage page where you can specify your search criteria. By entering in your Vehicle Number or by entering data into any of the other fields and clicking on the "Search" button, you can see a listing of mileage for that particular vehicle or a listing of all the vehicles that match the search criteria. You can then click on the “View Usage” link in the Action column to view that specific vehicle's activity details.
