Traffic moved to a newly paved lane at ND Highway 23 and ND Highway 1804 intersection in New Town on Thursday, August 21

Road work crews will shift a work zone and traffic will be moved to an adjacent road lane at the intersection of ND Highway 23 and ND Highway 1804 in New Town beginning at 7 a.m. on Thursday, August 21.

Traffic will be rerouted and remain head to head so that crews can continue paving work in the area. Traffic will continue to be reduced to one lane in each direction. The approximately two mile project includes reconstruction of this intersection, paving, new intersection signals and an additional center turn lane on ND Highway 1804.

During construction:

- Traffic will be head to head
- Speeds will be reduced to 25 mph
- Motorists should expect delays
- Flaggers will be in place as needed
- An 11-foot width restriction will be in place

The lane restriction will be removed when the project is complete in early October.

The NDDOT Williston District serves the transportation needs of the communities in northwestern North Dakota, including Williston, Alexander, Watford City, New Town, Stanley, and Berthold. NDDOT has been working very hard to build new bypasses, expand roadways, and provide roadway improvements that will enhance traffic movement in this very fast growing part of the state to get motorists where they need to go safely. To learn more about this year's projects visit www.nddotwilliston.com.
