Notes:

This cost schedule serves only as a general guide and is not intended to be a substitute for sound user judgment. Each cost must be considered in the light of actual conditions encountered in the evaluation of a particular sign. Some computations may exhibit minor mathematical errors of little or no significance due to rounding.

For back-to-back signs on same structure, add 25%.

For complex moves: Two or more bids will be obtained from professional sign movers and the lower bid will be used. This method should apply only when it is believed that the move schedule will not cover the costs involved. The bid method should be used mainly for sign moves wherein there is a distance of more than ten feet between the ground and the bottom of the sign.
