# SPP MEASUREMENT LOG

North Dakota Department of Transportation, Bridge
SFN 52137 (3-2026)

| Structure Number | |
|---|---|
| Barrel Number | Barrel Length |

-All steel pipe are to have internal measurements that are to be taken at intervals throughout the pipe.
-Locations should be marked by paint spots that can aid in future identification.
-Bold heads may be spray painted for location points.

Measurements to be taken in direction of inventory, south to north and west to east. If more than one pipe, the first pipe of the inventory direction shall be number one and second number two, etc.

Use one sheet per pipe.
