Speed Limit Temporarily Reduced to 25 MPH on I-94 Across the Grant Marsh Bridge in Bismarck/Mandan

BISMARCK, N.D. – Starting Thursday, June 29 at 6:00 a.m. until Friday, June 30 at Noon, the speed limit across the Grant Marsh Bridge over the Missouri River will be reduced to 25 MPH. Concrete will be placed on the middle section of the bridge on June 29, and the slower traffic speeds will allow the concrete to effectively cure. The speed limit on the rest of the I-94 Bis-Man Project will remain at 45 mph.

During construction of I-94 between Bismarck and Mandan:

- I-94 will continue to be open to east and westbound traffic throughout the construction project, utilizing a combination of lane closures and head-to-head traffic.
- Twelve-foot width restrictions remain in place
- Speeds are reduced to 45 mph. Speeds may be reduced even further at times throughout the construction zone.
- Vehicles are encouraged to use the zipper merge technique to enter sections of lane reductions in this project. To zipper merge, use both open lanes until the orange cones direct traffic into a single lane. At that point, vehicles should take turns alternating into the lane reduction to move more traffic more efficiently through the construction zone.

Construction work is expected to be completed in late fall. Regular updates on construction progress will be provided to the public throughout the construction project.
