

WHAT IS THE PROPOSED PROJECT?

The proposed project will repair various components of four structures along I-94.

- 1** Repair types at structure **94-108.354 (Glen Ullin Interchange)**:
 - Deck and Approach Slabs
 - Curb and Rail Post
 - Bridge Rail and Guardrail
 - Diaphragm
- 2** Repair types at structure **94-120.204 (Bluegrass Interchange)**:
 - Deck
 - Curb
 - Abutment
 - Guardrail
 - Erosion
- 3** Repair types at structure **94-123.200 (Almont Interchange)**:
 - Deck and Approach Slabs
 - Curb
 - Pier Column
 - Joint Seals
 - Abutment
- 4** Repair types at structure **94-195.090 (Long Lake Interchange)**:
 - Deck
 - Slope Paving Panels

WHY IS THIS PROJECT NEEDED?

The current structures have numerous deficiencies that were identified during inspections. Repairing the identified deficiencies will extend the useful life of the structures. General improvements to include bridge deck overlays, replacement of approach slabs, and minor bridge repair work. It is anticipated that the bridges will be closed and traffic detoured during construction. See Exhibits for detour routes.
