1½" Dia

4" Dia x 3/8" galvanized washer

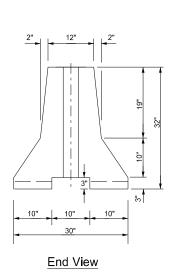

D-704-51

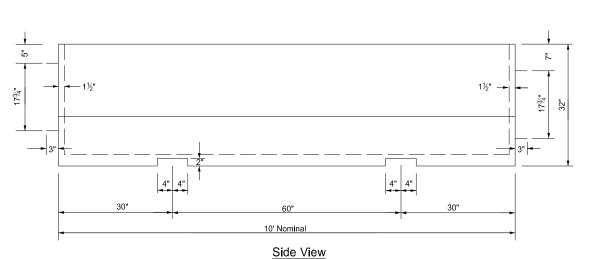

CONCRETE MEDIAN BARRIER (TEMPORARY USAGE)

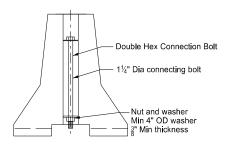

- Barrier ends imprinted with 4 inch letters A and B. Field match A end with B end.
- 2. Place barrier markers at the center of the barrier at 20' centers.
- 3. Connect barrier sections with 1 ½ Dia A-307 double hex connecting bolt. Maintain bottom nut and washer connection for duration of barrier installation.
- 4. Place barrier to minimize openings between individual sections.

Plan View

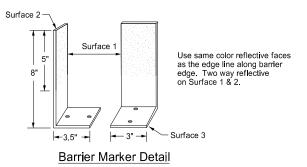

Bolt Connection Detail

Marker Body Use high impact,weatherable engineering thermo-plastic material conforming to the following:

the mo-plastic material comorning to the rollowing.		
Property	Result	ASTM Test Method
Thickness (min)	.090"	
Tensile strength (min psi) @ yield	5,500	D638
Impact strength @ -20°F (ft-lbs/in of notch)	3.2	D256 Method A
Impact strength @ 73°F (ft-lbs/in of notch)	14.0	D256 Method A
Flexural strength, PSI ¼" @ 73°F	8,000	D790
Flexural modulus, PSI ¼" @ 73°F	300,000	D790
Elongation @ yield	30%	D638

Connecting Bolt Detail

(One per 10 Ft section)

Reflective Tape
Use retroreflective, acrylic microprism material with acrylic backing, 3" wide, providing the following minimum optical performance with an observation angle of 0.1' measured in candlepower for the reflector:

Entrance Angle	Specific Intensity	
Yellow - 4"	136	
White - 4"	200	

Adhesive
Use factory applied solid butyl rubber 1/8" thick,

2" wide on $2\frac{1}{4}$ " wide release paper on surface 3 to temporarily mount markers to portable concrete barrier.
